***Allowable Subject Matter***

1. Claims 1-2 are allowable over the prior art of record.
2. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach a mobile communication system including a radio base station apparatus for determining uplink reception synchronization by using a pilot symbol of DPCCH from a mobile station the system comprising:

Means for re-encoding a TFCI value that has been once decoded and comparing the re-encoded TFCI value with a TFCI symbol received from the mobile station and determination means for using the number of TFCI error bits resulting from the comparison to determine uplink reception synchronization as substantially in independent claims 1,4 and 7. These limitations in combination with the remaining limitations in claims 1,4 and 7, are not taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
